

Conservex (Conservatory Radiator)

White Aluminium Radiators for Ultimate" Energy Efficiency"

Having created a new technology with heating elements now running vertically instead of horizontally, we can get more input to the radiator body and thus create a truly compact series.

We have moved on to create a compact series of radiators, note the physical dimensions of the radiators and their comparison to others (i.e. less width yet more capacity).

For us economical heating is all about speed, get

the radiator and then the room heating up quickly and then maintain that room temperature.

As the room temperature drops top it up rapidly.

This means minimal energy used for low running costs, yet maximum comfort. We have demonstrated how this works for us with real life year on year running tests.

All of this and still one of the slimmest, most elegant and efficient radiators on the market.

Wall mounted is by far the best for performance but wheels are an optional extra

Watts	Room size up to M ²		Height (mm)	Width (mm)	Depth (mm)	Weight (kg)	Ex Vat	Inc Vat
	Poor Insulation	Good Insulation						
1250	12	14	420	915	70	12	£250	£300
1500	15	18	420	1074	70	15	£265	£318
	Remote control						£33	£40
	Pair of feet						£25	£30

NB. All room sizes are based on latest insulation / double glazed / one outside wall. To avoid disappointment we would advise it is never a mistake to over specify. Always best to consider the next size up 85 to 100 watts per sqm.

Full integral control
24 hr / 7 day
Time / Temp
& set back

FIVE STAR RATING

DIY Install less than 15 mins

Notes:-

Subject to MWRAD Ltd terms and conditions Vat = 20%

- Transport, we highly recommend a pallet delivery for security and safe passage.
- Please ensure your location is suitable for truck delivery, ie no double yellow lines, road access etc.
- Payment Debit cards are free, credit cards are an extra 1.5% (Non Profit) commercial business cards 2%
- Pricing we endeavour to provide the lowest possible prices, discounts only available for orders in excess of 20 or 40
- We sell direct to the retail public, trade discounts would only be provided if you stock and promote our product or you purchase the above volumes.

Important Statement

"All statements made are our "own opinion" based on the real life and published running costs of four test rooms which we measured on our own premises".
"In excess of 30% of all our business comes from referred business from highly delighted customers who have all concluded exactly as we have.
As a consequence sales are up by a factor of double year on year to £4 million pa and now heading for £6 million pa".

- All prices are NON negotiable
- Orders of 10 + get free delivery
- Single orders of 1 or 2 radiators add £20 each delivery (except Highlands / Islands)
- We endeavor to provide the lowest possible prices, discounts only apply to 20 + or 40+
- We sell direct to the retail public, trade discounts only apply if you join our scheme, first order at full price subsequent orders at published trade prices.
