VTR without towel rail

VTR Towel Rail IPX4

Innovation

Too many electric heating products are variations on a very old theme. Not our electric radiators. We started with a blank page and designed every feature to meet the needs of a domestic user.

From our reinforced, chamfered corners to the patent pending heating cartridge, we have taken everything we've learnt from our 8 years experience in electric radiators to create a market leading product.

Through our programme of research and development we are also committed to lowering the running costs of our radiators and therefore the environmental impact of our products.

In 2014 we centralised our production and localised our supply chain.

Conservex Low Height Conservatory Radiator

Conservex

A low height radiator design specifically to fit in conservatories where full full height radiators simply won't fit.

Watts	Room size up to M2		Height (mm)	Width (mm)	Depth (mm)	Weight (kg)	Ex Vat	Inc Vat
	Poor Insulation	Good Insulation						
1250	12	14	390	972	73	12	£250	£300
1500	15	18	390	1134	73	15	£265	£318
Remote control							£35	£42
Pair of feet							£15	£18

NB. All room sizes are based on latest insulation / double glazed / one outside wall. To avoid disappointment we would advise it is never a mistake to over specify. Always best to consider the next size up 85 to 100 watts per sqm.

VTR Towel Rail IPX4

In a modern world it is not possible to stand still. New ideas and new technology constantly knocking at your door.

The VTR towel range has now been up graded to IPX4 the highest sensible rating for a bathroom.

This coupled with its all new look, you'd expect a price increase would you not? Prices remain the same so you get a higher specification with a much nicer look.

The VTR Towel Rail comes with one free white rail, further in white or chrome are available as extras.

**DESIGNED, SOURCED
AND BUILT IN BRITAIN**

World leading build quality

Aluminium Body

For optimal heat conduction with minimal waste

Compact design

Slimline, lightweight elegant

24/7 programmable controls

For economical, temperature actuated heating

Revolutionary heat cartridge

Maximise efficiency of heat delivery

FULL INTEGRAL CONTROL

24 hr, 7 day
Time, Temp & set back

VC Compact

Low running costs from 1.5 p per hour

DIY INSTALL LESS THAN 15 MINS

VC Compact

Using our patent pending heating cartridges in a vertical configuration instead of horizontally, we achieve a greater output from the radiator and thus create a truly compact product.

We have moved on to create a compact series of radiators. Note the physical dimensions of the radiators and their comparison to others (i.e. less width yet more capacity).

For us economical heating is all about speed, get the radiator and then the room heating up quickly and then maintain that room temperature. As the room temperature drops top it up rapidly.

This means minimal energy used for low running costs, yet maximum comfort. We have demonstrated how this works for us with real life year on year running tests.

All of this and still one of the slimmest, most elegant and efficient radiators on the market, made right here in the United Kingdom.

Watts	Room size up to M2		Height (mm)	Width (mm)	Depth (mm)	Weight (kg)	Ex Vat	Inc Vat
	Poor Insulation	Good Insulation						
600	6	7	565	486	73	8	£180	£216
900	9	11	565	648	73	10	£240	£288
1200	12	14	565	810	73	12	£250	£300
1500	15	18	565	972	73	15	£260	£312
1800	18	21	565	1134	73	18	£300	£360
2100	21	25	565	1296	73	21	£320	£384
Remote control							£35	£42
Pair of feet							£15	£18

NB. All room sizes are based on latest insulation / double glazed / one outside wall. To avoid disappointment we would advise it is never a mistake to over specify. Always best to consider the next size up 85 to 100 watts per sqm.
